Subject: Weekly.

Last week:

- Continuing to follow up on SpaceJam CY: pledges, heroes, number scrubbing. The effort started during Fix-it Week is starting to wind down.
- Got Blimpie/Blimpie++ and Bart transitions cleared up
- Revived move-to-Borg encouragement
- Started looking at VA P3 cleanup to make room for a content-ads cluster
- Announced SpaceJam heroes at TGIF
- Two Sun meetings on Android licensing
- Got a run through the Android technology
- Updated company OKR #7
- Wrote my annual review and one peer review - JavaClientDev meeting

This week:

- Try to move some move-to-Borg roadblocks
- Come up with a best VA P3 cleanup plan
- Plan SpaceJam CY futures
- Keep up to date with Fix-it Week pledges coming in
- Work with Ron Hughes to put JUICE in perspective with AJAX++ proposals and a client portability strategy
- Do at least three peer reviews
